## Contents

- 1. Part Number & Revision
  - 2. Material Compliance (RoHS/REACH)
  - 3. Dimensional Inspection Results
  - 4. Electrical Test Results (Continuity, Insulation, Dielectric Strength)
  - 5. First Article Approval Signature / Date
  - 6. Process Flow Summary
- 

### 1 Part Number & Revision

Part Number	Revision	Description
J1939-16-001	A	16-Pin Diagnostic Cable, Custom Wire Harness

### 2 Material Compliance (RoHS/REACH)

- Conductor: Tinned Copper, RoHS Compliant
- Insulation: PVC/PE, REACH Compliant
- Connector: DB15 Male/Female, RoHS Compliant

### 3 Dimensional Inspection Results

Feature	Spec	Measured	Pass/Fail
Cable length	500mm ±5mm	498mm	Pass
Pin Spacing	2.54mm ±0.1mm	2.53mm	Pass
Connector Dimensions	Per DB15 Standard	OK	Pass

### 4 Electrical Test Results

Test	Standard	Result	Pass/Fail
Continuity	100%	OK	Pass
Insulation Resistance	≥100 MΩ	120 MΩ	Pass
Dielectric Strength	500V AC	No Breakdown	Pass

**5 First Article Approval Signature / Date**

Approval Role	Name	Signature	Date
QA Engineer	Linda Liu	[Signature]	2025-11-07
Production Supervisor	May Yang	[Signature]	2025-11-07
Customer Engineer	Terry Luo	[Signature]	[Date]

**6 Process Flow Summary**

Stage	Key Steps	Quality Control (QC)
I. Material Preparation & Preprocessing	Raw material procurement → Cable cutting → Insulation stripping	IQC + In-Process Checks
II. Terminal Connection & Initial Assembly	Welding & tinning → Connector assembly → Inner molding	100% Electrical Testing
III. Outer Molding & Finishing	Outer molding → Electronic testing	Visual & Electrical Verification
IV. Final Inspection & Packaging	Final inspection → Rework → Assembly & Fixing → Packaging	Final Quality Control (FQC)
